SOLVING THE PUZZLE OF FIRE

# Structure Fires Capability Statement

**We are leading experts in fire and explosion investigation in Australia and abroad, and our personnel have offered clients thorough and impartial fire investigation services for over 40 years.**

Our team of qualified and experienced specialists solve the puzzle of fire in buildings and structures, providing an overall understanding of a fire or explosion event from the ignition through to the spread and development. From garden sheds to homes, offices, factories and warehouses, we break down where, how and why a fire started, what fuel and ignition source was involved and how the fire spread through the structure.

We uncover the cause and establish the truth of the incident, identifying whether the fire was started accidentally or deliberately. We're with you every step of the way, and can provide expert witness testimony and evidence in court where required, as well as expert findings on individual or corporate responsibility, legal liability, compliance with legislation and standards, and many other factors required by our clients.

All of our investigations, both preliminary and in-depth, are conducted by internationally certified professionals. Our professional and prompt system of investigation and reporting sets us apart in the industry, and we take pride in our exemplary standards of client services and scientific techniques. We pride ourselves on our ability to communicate complex technical concepts into easy to understand event sequences for our clients and their staff, and ultimately judges and juries.

## **OUR ISO CERTIFICATIONS**

In February 2022 we were certified as complying with two international standards, ISO 9001 (Quality Management System) and ISO 27001 (Information Security Management). These certifications give our clients confidence in the quality of our work whilst protecting their data by adhering to these internationally recognised standards.

### **ISO 9001 QUALITY MANAGEMENT SYSTEM**

Being certified with ISO 9001 means we have taken steps to improve our operations and optimise the way we move into the future by having an internationally recognised quality management system and is found in only highly efficient organisations that make a commitment to continual improvement. We are excited to be moving into the future in a more efficient, professional manner by serving our clients with a product that will contribute to increase in its quality.

## ISO 27001 INFORMATION SECURITY MANAGEMENT

Achieving the ISO 27001 means we have now been signed off by an independent authority to a high standard of data protection to assure the integrity of your data when you do business with us. We now have a certified information security management system and processes in place so we can be more protective of your data.

Our services are globally renowned, and we have investigated incidents and given expert evidence in numerous locations throughout Australasia, South East Asia, Europe and Africa.
